

Serial No. 09/507,466
Reply to Office Action dated 11 May 2005

Docket No. MEMS-0253-US

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 - 11. (Cancelled)

12. (Previously Presented) A method of making an optical device, said method comprising the steps of:

dividing an angular pattern into a plurality of sub-angular regions;

determining micro-wedge configurations for directing light to said sub-angular regions; and

subsequently, generating an array of micro-wedges according to said micro-wedge configurations, such that adjacent micro-wedges in said array have different configurations.

13. (Previously Presented) The method of claim 12, wherein the two-dimensional arrangement of said micro-wedges in said array is essentially random with respect to the two-dimensional arrangement of said sub-angular regions of said pattern.

14. (Previously Presented) The method of claim 13, further comprising the step of assigning said micro-wedge configurations to random locations in said array.

Serial No. 09/507,466

Docket No. MEMS-0253-USReply to Office Action dated 11 May 2005

15. (Previously Presented) The method of claim 14, wherein said determining step includes the step of calculating output surface slopes for said micro-wedges.
16. (Previously Presented) The method of claim 15, wherein said step of generating said array includes the step of forming phase tare surfaces in said micro-wedges.
17. (Previously Presented) The method of claim 16, wherein said generating step includes the step of forming output surfaces for said micro-wedges.
18. (Previously Presented) The method of claim 12, further comprising the step of providing a plurality of tiles of said micro-wedge arrays.
- 19 - 22. (Canceled)
